# Craftacular Kaleidoscope

In this fun and creative craft activity, children can transform a simple Pringles® can into a mesmerizing Pringlescope. Bring it to life by placing translucent beads inside the can, creating a dazzling display of colors and patterns!

Use this...

...to make this!

## You'll Need:

- Pringles® Can
- Glitter Paper
- Foil Paper
- Acetate Circle
- Translucent Beads
- Tape (not included)

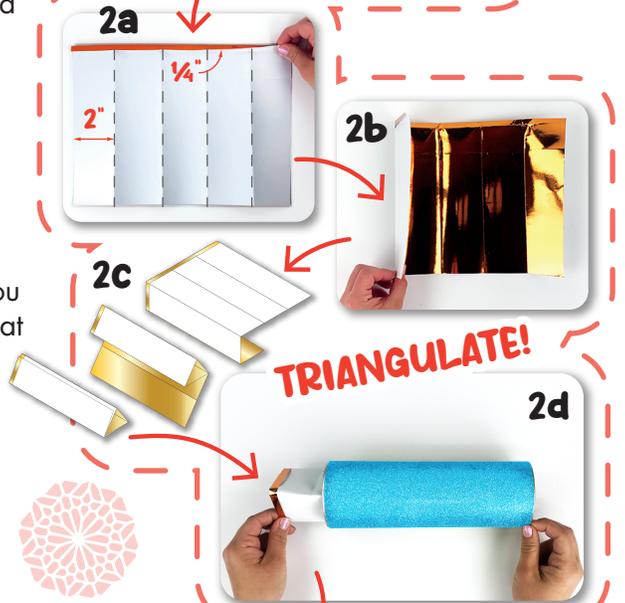

### STEP 1

Wrap a piece of your glitter paper around the pre-drilled can and tape it in place.

### STEP 2

- With the white side of the foil paper facing up, fold one of the long edges over by about 1/4".
- Make folds every 2" along the short side to form a triangle.
- The foil side will be the inside of the triangle. You will have some overlap at the end.
- Insert the foil triangle tube into the can.

### STEP 3

Insert the acetate circle into the can. It should rest on the foil triangle tube.

### STEP 4

- Pour in the translucent beads and place the lid back on the can.
- Aim the kaleidoscope towards the light, look through the hole, and spin the can to create colorful patterns.

Great Job!!
